

## President's Corner by Chris Laws

I finally can fly again! I began to lose hope that I would ever be able to get my bi-annual done. But I took my physical and got that out of the way. I had some time scheduled off this last week partly because I thought I would be traveling to Texas (but that's another story for later) so I called United and asked who was available because everyone I knew was too busy or out of town. It took me two days to get my hour in but I'm good to go now. Only problem is I don't have a flying plane. So who wants to help me hang some wings on my Rans?

I was supposed to be driving to Texas to trade the Rans S12 for a Taylorcraft. But the guy who called me everyday at first never returned my calls. So now I still have the Rans. I would really like to finish it so I could have a plane to fly while I build my RV 7. So like I said who

wants to help me finish my Rans? I need to install the gas tanks, hang the wings, install the nose cone, and redo a little wiring. That is really about all that is left to do. So close but for me it is the part where I need help to spur myself on and keep going and actually see a project completed.

I am going camping with my family so I will be out of town for our next meeting. I'm not sure who will be leading it or what exactly will be discussed. Stay tuned to your emails for more information.

I also want to let everyone know now that this year will mark the end of my two year term as President. While its been a pleasure serving you as President I am letting you know now that I will be unable to serve again. So start thinking now who could replace me. My wife as well, who is doing too much is feeling overwhelmed with all she has to do. We will also be looking to replace her as treasurer. Other roles that are available for people to fill are hanger boss, membership, and help with the newsletter mailings.

On a fun note, I got to land at Monterey Bay Academy this weekend. It is such a fun little airstrip to land at. It is right there on the beach. In fact while I was there on Monday giving Bob a hand with the new mower, two planes came in to land while I was cutting the grass. They came in from San Carlos, parked their planes, and went for a walk down on the beach. Clearly this is a unique location for an airstrip. So I encourage any of you who have not flown in there yet to do so. Also remember that the air field is maintained by a nonprofit organization and could use your support.

That's all I can think of to tell you at the moment.

Keep flying, keep building, and keep having fun!

## Chapter News EAA Chapter Minutes

Date: 6 May 2014  
 Time: 7:30 PM PST  
 Place: EAA 1119  
 Hangar, 60 Aviation Way,  
 Watsonville, CA  
 Type: Chapter Meeting

How called: Regularly scheduled.

How notified: Chapter Newsletter and Website calendar.

### Visitors

- Steven Lee
- Brian O'Conner
- 2 more
